

# SHOW CHEMISTRY SOME LOVE!

## FLOWERS

Bouquets of flowers would not be as beautiful without fertilizers produced in part by **Syngenta**, **Nutrien**, and **CF Industries**.

## CARDS

The paper made by **Georgia Pacific** makes it possible to send thoughtful cards to your loved ones.

## BOX OF CHOCOLATES

Who doesn't love a box of chocolates on Valentine's Day? Your favorite chocolate candies are made tasty by vanilla flavoring that is produced by **Solvay**.

## BALLOONS

Heart shaped balloons add the perfect touch to any Valentine's celebration. Balloons are made of polychloroprene, which is produced at **Denka**, and they float because of the helium produced by **Air Products** and balloon gas produced by **Air Liquide**.

## DATE NIGHT ESSENTIALS

Everyone wants to dress to impress on this special date night! **W.R. Grace** produces SYLOID silica which is found in nail polish, lipstick, and other cosmetic items. **INEOS Oxide** produced triethanolamine, which is the main ingredient in shaving cream.

## TEDDY BEARS

Teddy bears make the perfect Valentine's Day gift. Companies like **BASF** and **Shell Geismar** produce the polyester that makes up these toys.
